

## Carpet Protection Film (CLEAR)

Self-Adhesive Film 600mm x 100m

**Carpet Protection Film** is a self-adhesive protection film designed for the temporary protection of carpeted surfaces against dirt, dust, scuffs and general foot traffic. It is not designed to protect against corrosion, humidity or chemicals. The film is designed for application to synthetic carpets and can be easily removed without leaving any residue.

Each of our Surface Protection Films is suitable only for the intended surface and this Carpet Protection Film (Clear) should **ONLY** be used on synthetic carpets. We are not responsible for the misuse of this product, and the following application instructions must be adhered to. If you require the protection of a different surface other than carpet, please contact your distributor for other Surface Protection Films we offer, including Hard-Surfaces (Multi-Purpose – Tiles, Laminates, Vinyl) and Glass/Windows.

### Instructions/Warnings

- Carpet Protection Film (Clear) is for use on synthetic carpets only.
- Film should be tested on a small trial area for adhesion and suitability before it is used on the entire area required.
- Must be stored in clean and dry conditions at a temperature between 2 and 38°C.
- Film should be applied within a 6 month period from delivery.
- Do not apply to wet or damp carpet. Freshly cleaned carpets must be allowed to dry completely for a minimum of 10 days. Check carpets before applying.
- Do not use with under floor heating.
- For temporary surface protection only. Do not leave film in place for more than 4 weeks. If protection is required for a longer period, ensure film is replaced.
- Examine film periodically and remove or replace as necessary, especially if exposed to high temperatures, direct sunlight or other extreme conditions. If film is exposed to direct sunlight (e.g. near windows or patio doors) then ensure film is replaced weekly.
- To avoid risk of injury or slipping, do not place mats or rugs on top of film.
- Special applicators are also available for quicker and easier installation.
- Film cannot be recycled after use and should be disposed of responsibly. The inner core and shipping cartons are recyclable.
- Please contact your supplier for any further information or application advice.
